# **Chapter 1**

## **Introduction**

This chapter sets the stage by providing an overview of the study's focus and objectives. It outlines the problem domain, research problem statement, and if applicable, the software requirements specification to give readers a comprehensive understanding of the study's scope and purpose.

### **1.1 Problem Domain**

This section delineates the field or area of interest that the research addresses. It identifies the specific challenges, issues, or gaps within this domain, providing context for the subsequent investigation.

### **1.2 Research Problem Statement**

Here, the precise problem or question that the research aims to address is articulated. It clarifies the gap in knowledge or practice that the study seeks to fill, guiding the reader towards an understanding of the research's significance and relevance.

### **1.3 Software Requirements Specification (if applicable)**

If the research involves the development of software, this section outlines the functional and non-functional requirements of the software to be developed. It details the features, constraints, and performance criteria necessary for the successful implementation of the proposed solution.

# Chapter 2

## Literature Review

This chapter critically examines existing literature relevant to the research topic. It identifies key studies, theories, and findings, providing a foundation for the proposed research and highlighting its relationship to prior work.

### 2.1 Related Research

Mention from 5-10 research items here.

#### 2.1.1 Research Item 1

Each significant piece of literature related to the research topic is reviewed individually, beginning with Research Item 1. This section summarizes the research, analyzes its strengths and weaknesses, and discusses its relevance to the proposed study, thereby situating the current research within the broader scholarly discourse.

##### 2.1.1.1 Summary of the research item

A concise overview of Research Item 1 is provided, encapsulating its main findings, methodologies, and conclusions in one or two paragraphs.

##### 2.1.1.2 Critical analysis of the research item

This subsection evaluates the strengths and weaknesses of Research Item 1, considering factors such as methodology, data analysis, and theoretical framework. It offers insights into the credibility and limitations of the study.

### **2.1.1.3 Relationship to the proposed research work**

The connection between Research Item 1 and the present study is explored, highlighting how the findings, methodologies, or gaps identified in the literature inform and shape the current research approach and objectives.

## **2.1.2 Research Item 2**

### **2.1.2.1 Summary of the research item**

### **2.1.2.2 Critical analysis of the research item**

### **2.1.2.3 Relationship to the proposed research work**

## **2.2 Analysis Summary of research items**

Tabular representation with discussion of the critical analysis of the research items discussed in the previous section of this chapter.

# **Chapter 3**

## **Proposed Approach**

This chapter outlines the methodology or theoretical framework proposed to address the research problem. It can be a Framework/ Heuristic/ Algorithm/ Protocol/ or a Mathematical-model.

The chapter delineates the steps, methods, or models that will be employed to investigate the research questions and achieve the study's objectives. Include graphical representation with description for a clear understanding.

# **Bibliography**
